Experience

Freelance • Full-Stack Developer
March 2024 - present

- Full-Stack application development using Spring Boot + Next.js.
- Creating REST APIs, configuring JWT authentication and role-based access (Spring Security).
- Working with PostgreSQL, Redis, ORM (JPA, Hibernate).
- Deployment and containerization with Docker, environment setup. API integration with the frontend, client-server interaction.

Terra Nova • Full-Stack Developer
August 2024 - present

- Developed a system for teachers using Python + Flask, which automatically parses data from an electronic diary.
- Implemented data processing and analysis.
- Integrated with the frontend using AJAX for dynamic data updates
- Provided an intuitive interface for real-time viewing of student performance, schedules, and attendance.
- Optimized the application's performance and deployment using Docker for easier setup.

Education

Terra Nova - Technical College | Technician Programmer
September 2021 - present

Competencies

- Caching (Redis) – Configuring Redis for Spring
- JWT Authorization – Generating, validating Tokens, configuring Spring Security
- Spring Boot – Configuration, DI, Spring MVC JPA, Security, Actuator
- Testing & Debugging – JUnit, Mockito, Postman, logging, Spring Boot DevTools
- REST API – Developing RESTful services, OpenAPI, error handling, versioning.
- Database Optimization – Indexing normalization

Skills & Tools

- Java
- JavaScript
- TypeScript
- Github
- Docker
- PostgreSQL
- SQL
- Spring Framework
- JUnit
- Mockito
- OOP
- Figma
- Git
- MySQL

Languages

- English - B2
- Polish - B2
- Ukrainian - native
- Russian - native
